DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 and 6-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - a. With respect to claim 1, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a NMR flow cell assembly for holding a NMR sample fluid comprising an internal flow cell adhesive-separation barrier extending between the surface of the flow cell and the connector, position^{ed} to separate the flow cell adhesive from an interior surface of the cell whereby said adhesive is isolated from contact with said sample fluid in combination with the remaining limitations of the claim.
 - b. With respect to claim 14, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a NMR flow cell assembly for holding a NMR sample fluid comprising an annular adhesive-separation barrier extending between the flow cell and each pair of connectors and said adhesive is isolated from contact with said sample fluid in combination with the remaining limitations of the claim.
 - c. With respect to claim 17, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a NMR probe comprising an annular adhesive-separation barrier extending between the flow cell and

each pair of connectors whereby said adhesive is isolated from contact with said sample fluid in combination with the remaining limitations of the claim.

d. With respect to claim 18, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a NMR method comprising inserting a MR sample fluid into the flow cell assembly that comprises an annular adhesive-separation barrier extending between the flow cell and each pair of connectors whereby said adhesive is isolated from contact with said sample fluid in combination with the remaining limitations of the claim.

e. With respect to claim 21, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a NMR flow cell assembly for holding a NMR sample fluid comprising a sealing barrier positioned between a transverse end surface of the flow cell and a transverse surface of the connector for sealing an interface an interface between the flow cell and the connector whereby said adhesive is isolated from contact with said sample fluid in combination with the remaining limitations of the claim.

f. With respect to claim 29, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a NMR probe comprising a sealing barrier positioned between a transverse end surface of the flow cell and a transverse surface of the connector for sealing an interface an interface between the flow cell and the connector whereby said adhesive is isolated from contact with said sample fluid in combination with the remaining limitations of the claim.

g. With respect to claim 30, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a NMR method comprising inserting a MR sample fluid into the flow cell assembly that comprises a sealing barrier positioned between a transverse end surface of the flow cell and a transverse surface of the connector for sealing an interface an interface between the flow cell and the connector whereby said adhesive is isolated from contact with said sample fluid in combination with the remaining limitations of the claim.

h. With respect to claims 2-4, 6-13, 15-16, 19-20, 22-28 and 31-32, the claims have been allowed due to their dependency on claims 1, 14, 18, 21 and 30 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
